Full-Stack Developer — Next.js, FastAPI

EDUCATION

Reva University

B.Tech in Computer Science & System Engineering

Bengaluru, Karnataka

Expected June 2027

Presidency PU College

Class XII — Karnataka State Board

Bengaluru, Karnataka

2022

SKILLS

Languages: C++, JavaScript, Python, Java, SQL
Frontend: Next.js, React, HTML, CSS, Tailwind CSS
Backend & APIs: FastAPI, Node.js
Databases: PostgreSQL
Tools: Git

PROJECTS

MaaCare — a maternal care assistance Platform

- Developed **MaaCare**, an AI-powered maternal healthcare web platform using **Next.js**, **FastAPI**, and **PostgreSQL** its designed to support pregnant women with personalized health guidance
- Implemented **JWT**- based authentication alongside **Fernet symmetri encryption** to secure patient profile data.
- Built a multi-agent AI system using **PydanticAI** for personalized healthcare assistance with specialized agents.
- Developed an AI-powered packaged food analysis feature by integrating barcode scanning, the **Open Food Facts API**, and **Gemini** to generate structured pregnancy-specific safety recommendations.
- Implemented a layered FastAPI backend to improve code maintainability through separation of API handling, business logic and data validation.

EduNext — AI-Powered Learning Platform for Neurodivergent Kids

- Built a full-stack platform using **React** and **FastAPI**, designed specifically for neurodivergent children (ADHD, dyslexia, autism) with condition-based adaptive learning
- Integrated **OpenCV** for AR-style interactive lessons and **sign language teaching** with real-time camera-based visual interaction
- Implemented **AI-generated flashcards**, a **storybook generator for kids**, and a **reading mode** — all powered by **Google Gemini API**
- Developed **dynamic quiz generation** with image-based questions and emotion-aware adaptive patterns based on the child's condition

ACHIEVEMENTS

- **3rd Place — IEEE Technovate 2026 (Mini Project Expo)**
- **100/100 in Computer Science — Class XII, Karnataka State Board**
